

## OUR MISSION

CellCAN's mission is to mobilize knowledge and stakeholders across Canada to significantly advance regenerative medicine and cell therapy research and clinical development.

## HOW?

By improving **quality, safety and feasibility** of cell & gene therapy in Canada through **optimal manufacturing practices**.

## WHY?

Cell & gene therapy manufacturing in Canada should operate under a **common seal of quality to increase capacity and rapidly and effectively migrate safe and innovative treatment concepts into standard clinical practice**.

CellCAN's **growing network** includes:

- **13** Network Affiliates
- **25** partner organizations
- **160** Network collaborators

## JOIN OUR NETWORK

### ADDED-VALUE of being part of CellCAN

- Connect with a **network of Canadian researchers, clinicians and HQP from coast to coast**, through our platforms, workshops and events. CellCAN offers unique networking opportunities
- Connect with a **community of knowledge sharing** (Extranet) in cell & gene therapy with over 150 shared SOPs across multiple cellular therapy platforms
- Acquire new skills through **manufacturing-oriented HQP training** in cell & gene therapy
- Gain access to a **concerted, open dialogue** between Canada's primary assemblage of cell therapy stakeholders and the **Canadian regulatory agencies**
- **Stay up to date with Canadian policies**, like the New Substances Notification Regulations
- Access expertise to achieve the highest standards of cellular production (GMP)

# Delivering world-class manufacturing in highly innovative cell, gene and tissue products

## EXPERTISE AND SERVICES

- GMP clinical grade and commercialization production capacity
- Pre-clinical research validation
- Quality Assurance / Quality Control (QA/QC) services

- GMP cleanroom laboratory and workforce services
- iPSC, MSCs, T-Cells, NK cells, mononuclear cells, autologous cultured corneal epithelium, self assembled skin substitute, cultured epidermal autograft, tissue dissociation, pancreatic islets and much more
